

Guide:**Einar Ragnar Sigurðsson** kt. 170267-5329**Experienced guide**

I have worked as a tour guide for Ferðafélag Íslands since 2011, where I have been part of a group of guides who lead subscription tours, usually one to two tours per month. Since 2019, in collaboration with another guide, I have been in charge of such monthly projects: managing, organizing as well as guiding the trips. Prior to that I had taken care of guiding on various trips, mainly for my colleagues in companies where I have been working, but then without special payment. Most of these trips are day trips hiking to mountains that are within reach for a day trip from Reykjavík. I have also occasionally taken a few longer trips.

In total, the trips I have been in charge of as a guide, close to 200. All the trips are some kind of hiking trips, but I also have considerable experience with longer and shorter cross-country skiing and cycling trips, although I have not directly been in the role of a guide or person responsible for such trips.

Education and training as a guide

Valid Wilderness first respondent (WFR) license.

Basic training as a rescue team member, HSSR.

Good knowledge of Icelandic nature, especially geology through education in Earth science in University of Iceland – MS degree in Geophysics.

Other education

Geology: MS degree in Geophysics from University of Iceland, year 2019.

Engineering: CS degree in Mechanical and industrial engineering from University of Iceland, year 1991.
